

# 24-core fiber optic splice closure only fuses 12 cores

## Overview

A, sp-GJS-24C is made of high impact engineering material, with aluminum outer components and stainless screws which make the structure of the closure more stable. The sealing material is reusable. There is a splice tray that can be used with splitter and sleeve protection for 12 - 96 pieces and has rubber. To hold the internal equipment from falling Resistant to high temperature. It is used as a termination point for the feeder cable to connect with drop cable in FTTx network system. This product is made from the high-quality and with the mechanical sealing structure filled with the sealing material. The external. Features

- RoHS compliant
- Can be used in through, branch or mid span splice locations
- Suitable for aerial, underground duct or direct burial applications
- Great mechanical performance
- Great resisting aging performance
- High air-proof, damp-proof and resisting, lightning strike performance
- Can be place.
