

# 24-port external network access switch

## Overview

A 24 port switch typically supports Gigabit speeds (10/100/1000 Mbps) on each port, making it suitable for most business and office networks. Higher-end models may offer multi-gig ports or 10-Gigabit ports and uplinks for faster data transfer and better performance under heavy. The KN series KVM over IP switch provides local console and remote over IP access for users to monitor and access their entire data center over a network. The KN series offers superior FHD video resolution up to 1920 x 1200, virtual media transmissions at double speed, FIPS 140-2 with level 1. • Connects up to 24 network devices - PCs, printers, and servers - to share and transfer files and videos across your network • Power over Ethernet easily and cost-effectively powers wireless access points, video cameras, and other network-connected endpoints • Simplified, web-based management for. Power your business with a 24 port switch built for speed, stability, and scale. Keep every device connected with wired performance you can count on. 3at/af-compliant PoE, with a total PoE power supply up to 180W, powerful and flexible enough for users to deploy wireless access points or IP-based network surveillance cameras.
