

600mm Thickness of Channel Cable Tray

Overview

The 600mm medium duty cable tray provides a robust and reliable solution for industrial and commercial cable management systems. With T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy). The choice of material for any particular installation depends on the installation environment. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. For ladder trays, side rail height and material thickness matter more than rung spacing when it comes to load capacity. Perforated (also called trough) cable trays. Tra deth Finishes G ht di galvanised D dee galvanised S stainless steel Product ranges The distinctive slot pattern on Swifts cable tray provides installers with total fl exibility. Adding 3 to your basket would mean you receive 1 x 3 metre length.
