

# Cable tray turning connection plate

## Overview

A cable tray joint plate is a flat metal piece used to join two cable trays. It comes with drilled holes for nuts and bolts. Is your cable tray system optimized for safety, dependability, space and cost savings?

Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. This is a high-performance metallic coating which offers an optimum surface protection in a wide variety of aggressive and demanding environments, indoor as well as outdoor. The unique alloy of small amounts of magnesium and/or aluminium in the zinc bath provides ULTRA protection with a self-healing. maintain spacing or to keep cables in place when the tray is bent the minimum bend radius for cables as they exit the bottom of the cable tray. Accessories must be ordered individually to complete the system. Splice plates for system assembly come in six variations designed for specific applications: straight, expansion straight, fixed. A cable tray joint plate might seem like a small component. You will learn about. The easy-to-install system is suitable for cables from 3-33 mm and is compatible with the standard rectangular connector cutouts used in industry.
