

Distribution box LP30

Overview

The DPS-LP30 is a 30 W / 60 Wp DIN-Rail adjustable power supply. The digitally-enabled, patent pending technology enables true long life power supplies of 20 years+ at 40°C ambient. This is achieved by replacing electrolytic capacitors by film. Our intelligent and mechanical boxes in the area of power and data distribution offer modular solutions for all voltage levels and at the same time optimize functionality - for maximum efficiency with maximum safety. As a pioneer of the power and data distribution of the future, LEONI always keeps. Structural features The shell material of the LPZ30 series photo box is made of high-quality steel plate, which shell is treated with high-voltage electrostatic spraying or electroplating, with plastic transparent cover plate. With modern aesthetics, safety-focused construction, and user-friendly features, it meets the needs of diverse applications. The DA series is characterized by an open design, which allows the user to access the internals at any time.
