

Fiber optic box without router

Overview

Fiber internet doesn't need a modem because the ONU takes its place. The ONU connects directly to the fiber line entering the home. It converts the incoming light pulses into digital Ethernet signals that routers and devices can use. Before diving into our coaxial-free internet solutions, consult the table below for a quick. Yes, you can install internet without a cable outlet by using alternative options such as a DSL connection that uses your phone line, fiber-optic internet that can be connected via an Ethernet cable, or wireless internet service that utilizes a modem or router without the need for a cable outlet. Some ISP's use ONT's that have integrated routers - its easier for THEM but it gives them more control over your network. They will likely run fiber to your house and then from there use a converter to. Fiber and DSL internet usually use phone lines, but some plans give you internet without cable or phone service. Traditional internet services rely on copper cables that transmit electrical signals.
