

# Fiber optic cable manufacturer s price

## Overview

A: The price varies significantly by type. On average, Single-mode (OS2) ranges from \$0.05 to \$0.10 per foot. Factors like armor, jacket rating (LSZH), and raw material indices influence the final ex-factory price. One supplier in your inbox promises \$0.05 a foot, while a domestic distributor is asking for ten times that. You search “how much does fiber optic cable cost” on Google, and get vague answers from five years ago. As someone who has spent the last decade on the production floors here at Wolontek, I can tell you that fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more.
