

# Fireproof putty for electrical cable trays

## Overview

Intumescent putty is ideal for sealing pipes, cables and service penetrations, especially ones with odd shapes. Red in colour, each 1kg tub of intumescent putty can give up to 4 hours of fire resistance - depending on how deep the coverage - and has been tested to BS476: Part 20:. The following charts give the number of 3M pillows needed to completely firestop an opening that cable tray passes through. \* Two (2) sticks of moldable putty (part number FSP-MPS) are also needed for each opening. UL Listed Systems Concrete Wall - C-AJ-4056 3 HR F-Rating, 3/4 HR T-Rating Gypsum. Whether you need to firestop outlet boxes or small cable penetrations, you will find the solution here - our quick to install putty pads, putty sticks and cable discs. Spend less time with long, complex firestop approvals and focus instead on completing projects more efficiently and confidently. Pliable one-part intumescent firestop material is designed for wall openings and through penetrations Provides draft and cold smoke seal, helps reduce noise transfer Firestop tested for through penetration and membrane applications for up to 4 hours in accordance with ASTM E 814 (UL 1479) For. SpecSeal® SSP Firestop Putty is a high-performance, non-hardening intumescent firestop putty designed to seal cable penetrations and electrical outlet boxes with ease. Its soft, moldable formulation allows installers to quickly hand-form the putty around grouped cable bundles, creating a Firebreak 55 Fire Resistant Non-Setting Putty is made from silicone based ablative polymer with additional fire resistant additives, and is designed to reinstate the fire resistance of small cable service penetrations through walls. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production.
