

# How much does a 1 2-meter network rack cost

## Overview

In the US, a fully equipped rack can cost anywhere between \$15,000 and \$50,000 or more, depending on your requirements. This includes multiple servers, which may cost \$1,000 to \$5,000 each, along with storage systems and networking equipment like switches and routers. Understanding kilowatts per rack (kW/rack) is important for businesses using colocation. It helps improve efficiency and control costs. Just like virtual CPUs (vCPUs) relate to physical CPUs in cloud computing, kW/rack defines power use per server rack. This impacts colocation pricing, energy use. From ₹20,000 for a basic open-frame rack to over ₹2 lakhs for a fully enclosed, cooled, shock-proof, and fire-resistant enclosure—the variation is massive. But understanding this range, and what makes one rack cost more than another, can help you make smarter infrastructure decisions. This blog. Standard rack installation: \$500 to \$2,000 per rack. Equipment Costs The costs of the actual hardware that's being installed can range. Filter by location, rack size, pricing, bandwidth, power, and DDoS protection to find the perfect colocation plan for your servers. Some companies may change their pricing or plan offerings over time, so data may not be 100% accurate.
