

# Indoor wall-mounted distribution box

## Overview

We also sell plastic wall mount fiber enclosures for indoor and outdoor use. Our plastic enclosures for indoor or outdoor applications feature UV-stabilized plastic materials for added weather resistance. Select plastic distribution panels. We also sell plastic wall mount fiber enclosures for indoor and outdoor use. Our plastic enclosures for indoor or outdoor applications feature UV-stabilized plastic materials for added weather resistance. Select plastic distribution panels work with the Multilink FlexGrid™ mounting system to fit any manufacturer's splitting footprint. Standard wall mount enclosures from Multilink deliver distribution and connectivity solutions for network providers. All of our series of wall mount distribution panels, including the standard series, can come with your specified logo for applications such as OEM. Our standard wall mount fiber enclosures can also feature lockable doors for the netw. Dual door fiber enclosures provide our highest level of distribution panel security. They give you the option to separately lock the network and distribution doors for more control over panel access. The second door is also removable to enable you to increase access as necessary. These flexible enclosure products provide the security options you ne. The Multilink Signature Series features a full line of wall mount fiber optic enclosures for our CT-X cassettes. Our industry-leading CT-X cassettes allow for quick installation through a plug and play process. Each cassette houses up to 12 adapters for patching capabilities. Meanwhile, the splice chip holder on the inside of the cassette can accom. When you need to house your network distribution outdoors, our NEMA 4 enclosures offer the necessary defense. As NEMA 4-compliant products, they protect components in environments that require high security, durability and weather resistance. Each enclosure has an aluminum construction with polyester powder coating or impact-resistant plastic const.
