

LVB distribution box

Overview

A low voltage distribution box is an essential component used to receive, control, and distribute electrical power within systems operating below 1 kV. It's a full IP2X protected system consisting of Z-busbar, InLine ZLBM, Z-busbar connectors and Nordicab enclosure. They also centralize power distribution monitoring and management for. Engineered for performance and protection, our indoor cabinet range includes multi-service distribution boards (MSDB) and sub-main distribution boards, all built to ensure easy installation, space efficiency, and long-term reliability. These critical components house essential elements, including circuit. xComfort KLV is a flush and hollow-wall mounted compact distribution enclosure for residential and small commercial applications. In addition to an extensive range of 1- to 5-row energy distribution cabinets designed and approved according to IEC/EN 62208 and IEC/EN 60670-24, the series also. From circuit breakers and buses to enclosures, panel boards, and switchboards, we offer a full range of safe, reliable solutions for low-voltage electrical distribution applications. Air circuit breakers from 630A to 6300A Molded case circuit breakers from 16A to 630A Molded case circuit breakers.
