

Laos Mobile Fiber Optic Cable Laying

Overview

In 2023, Laos made a major leap in its telecommunications system by installing 98,524 kilometers of fiber optic cable, an investment that significantly extended mobile signal coverage to remote areas. Officials announced the development on 26 June during the 9th Ordinary Session of the National Assembly. The expansion is part of a broader. Just move to Laos, first things first. Getting Fiber Internet to home. After an analysis of the current state of infrastructure sharing in L o PDR, this Expert Mission focuses on examining the best practices of infrastructure sharing and strategy. The Expert.
