

Maltese electrical distribution box protection

Overview

According to the Laws of Malta, every property connected to the national electricity grid (single and three phase installations) shall be equipped with an appropriate double-pole main circuit breaker, an overvoltage protective device and a residual current device. Darmanin Supplies offers a comprehensive range of electrical products, including distribution boards, protective devices, BS sockets and switches, and essential electrical accessories. Our high-quality solutions are designed to ensure safety, efficiency, and reliability for residential, commercial. The Tracon Over and Under Voltage Relay is a 2 pole (2P) relay designed to protect electrical circuits from both overvoltage and undervoltage conditions. This relay is rated for up to 40 amps and is commonly used in industrial and commercial applications to prevent. We supply all kinds of type D, D0 and C fuse-links, as well as MCB's and various types of residual current protection switches from ASTI group. Amends Regulation 2 of the principal.
