

No network connection when fiber optic cable is plugged into the panel

Overview

Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power cycling or restarting your ONT (Optical Network Terminal) often resolves simple troubleshooting internet issues. Use the table below to see expert-recommended first steps for fiber. If yes there is a specific dhcp issue If no - and on windows is it "time out" or "destination host unreachable" in both cases check the arp table with "arp -a" are any entries listed other than the computer itself?

You could add a second computer to B with static and see if they can ping each other. I have been trying for 2 days to troubleshoot a fiber connection that I need between an existing Arista and a Cisco 3650. Right now, I can't get a lot of equipment to connect all with SFP-LH-SMD transceivers. First, check the basics—look for power issues on your optical network terminal and inspect all cables for visible damage. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled).
