

# Nordic Optical Module Mounting Machine Track

## Overview

GLOBAL-TRACTM pro by Nordic Aluminum, also known as the Three Phase Track, provides a specification grade track platform for mounting high quality fixtures. The heavy duty extruded aluminum profile is ideal for demanding applications where numerous and/ or heavy. + LASER COMPONENTS Nordic is your partner for detectors, emitters, fiber optics, and optics. The applications for laser optics and optoelectronics are as diverse as the technologies themselves: Sensor technology, range finding, biotechnology with environmental and life science, aerospace & defense. Dot, line, and cross-hair lasers indicate where to position a workpiece, set a welding seam, or drill a hole. At LASER COMPONENTS, we have been successfully manufacturing easy-to-mount positioning lasers for industrial applications for many years. Whether ordering single pieces, small, or large volumes with thousands of pieces, each individual request is processed reliably. You can select from many. These modules are based on System-on-Chip (SoC) ICs from Nordic Semiconductor's nRF51 Series, nRF52 Series, nRF53 Series, or nRF54L Series. Just like on the SoCs these modules offer you code space for your application as well as access to the ARM® Cortex™ M0, M4 or M33 processor and peripherals of. High-Speed Mounting Equipment for Optical Modules serves as the core apparatus in semiconductor packaging and optical module manufacturing, enabling the high-precision mounting of micro-nano components such as optical chips, lenses, and optical fibers onto substrates or carriers. Its essence lies. The Photona Group consists of seven companies who form the LASER COMPONENTS Group and Blau Optoelektronik GmbH.
