

Philippine Fiber Optic Cable Tray Remote Monitoring Type

Overview

This solution involves the installation of a distributed temperature sensing (DTS) system, which utilizes fiber optic cables for real-time temperature measurement along the cable trenches and cable trays. The DTS system consists of a DTS measurement unit, optical fibers. EXFO's remote fiber testing & monitoring solutions are built based on fixed OTDR test equipment placed at strategic central locations across the network. The condition of fiber optic installations are constantly checked and the locations of degradations or breaks are pinpointed within minutes of. Distributed Fiber Optic Temperature Monitoring Solution for Power Plant Cable Trenches and Cable Trays The increasing demand for power generation has led to the construction of larger power plants, which are equipped with extensive cable trenches and cable trays. Monitoring the temperature in these. Looking for reliable cable tray manufacturers in the Philippines?
