

# Price of a 6-square-meter outdoor server room

## Overview

On average, constructing a professional-grade server environment ranges from \$625 to \$1,135 per gross square foot. For small businesses, a basic setup with 1-2 racks can start around \$15,000 to \$25,000, while enterprise installations quickly escalate into the hundreds of thousands. Building a dedicated server room is a critical infrastructure investment for modern organizations prioritizing data sovereignty, low-latency software performance, and local control over computing resources. In 2026, the cost landscape is heavily influenced by rising hardware prices, specialized components, and labor. Use this calculator to find the square footage, square yards, square meters or acres for a building, home, garden or construction project. How could this calculator be better?

Suggest a new calculator! Calculate the square footage. The server room cost calculator provides a simple yet powerful tool to estimate the expenses associated with setting up and maintaining a server room. See also: 10 Gbps Unmetered Dedicated Servers 1. Every server / it room remodel is made up of these individual assemblies. Additionally, the location of the server room is essential; costs can vary widely based on geographical location, local building codes, and the availability of necessary infrastructure.
