

# Specified height of distribution box

## Overview

Wall-mounted boxes should be 4. This height makes it easy to reach without bending or stretching. Ground-mounted boxes should be raised 2 to 4 inches to avoid. The proper installation of a distribution box involves placing it at the right height to ensure safety and convenience. Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. However, this height can be adjusted higher or lower appropriately for operational and maintenance convenience, provided design. Load distribution: Identify high-power equipment clusters (such as processing areas, HVAC systems) and low-power areas (such as offices, control rooms), strategically place distribution electrical boxes, and minimize cable length and power losses. 7m away from the ground, the installation height of the control box is 1.
