

Tunisian OEM Optical Switch 200G

Overview

The PL-2000M is an advanced 200G multi-protocol multi-rate solution for building high capacity optical transport networks. This 1U platform with flexible architecture enables the same device to be used in multiple applications and to adapt to network growth and changes. The PL-2000M provides high transport. Use Juniper's portfolio of 2 x 100G optical transceivers to service point-to-point 200G interconnections or breakout to interoperate with widely deployed legacy four-wavelength 100G interfaces. Our 2 x 100G modules use Duplex CS connectors, boasting a 40 percent size reduction from Duplex LC. Mouser offers inventory, pricing, & datasheets for Optical Switches. The 200G Muxponder Transmitter card supports two QSFP28 Client interface and one CFP2 line-side interface to support single-channel 200Gbps large grain data transfers. The industry's most advanced coherent technology and FEC forward error correction coding technology enable high-capacity. How does 6W market outlook report help businesses in making decisions?

6W monitors the market across 60+ countries Globally, publishing an annual market outlook report that analyses trends, key drivers, Size, Volume, Revenue, opportunities, and market segments. 5 Gbps data rate, thus 200G Ethernet application.
