

U3 optical cable

Overview

Optical™ Cables by Corning connects computers and devices at incredible speed and over longer distances. The maximum cable length can be up to 50m. A substantial increase in USB2. Use YOFC BendRobust® special bending optical fiber, which has been tested by the State Key Laboratory of Optical Fiber and Cable. And the maximum transmission distance may exceed 100 m without adding any relay equipment. 8 mm diameter structure, supporting high-speed USB 3. Its unidirectional construction separates AV signal transport via fibre from power and data lines. Abbreviated as USB3 AOC, the AOCFiberlink FPUC-3003 Pure Fiber USB3 Active Optical Cable is also called USB3 Optical Cable, USB3 Fiber Optical Cable, Fiber Optic USB Cable. This USB3 Active Optical Cable has two standard USB3 type-A male connectors, utilizing high flex OM1 pure fiber optical cable. Active Optical Cable (AOC) is a cabling technology that accepts same electrical inputs as a traditional copper cable, but uses optical fiber “between the connectors”.
