

UAE IDC Data Center Construction Project

Overview

Emirates Integrated Telecommunications Company has entered into a landmark agreement with Microsoft to construct a state-of-the-art hyperscale data centre in the UAE. The UAE has attracted investments from major industry players such as Amazon Web Services. As the Middle East emerges as a global data centre powerhouse - driven by AI, cloud demand, strategic investments - it presents unmatched upside for infrastructure investors and digital operators seeking scalable, high-growth opportunities. The Middle East is rapidly becoming a data centre. Demand for cloud services, digital transformation, plus the Internet of Things (IoT), and artificial intelligence (AI) tech is driving growth in MENA's data centre markets. Initiatives such as New Kuwait 2035 and Digital Oman 2030 are also contributing. From hyperscale data centres to mission-critical facilities, we partner with forward-thinking clients to deliver projects that are. UAE Data Center Construction Market is worth USD 3.5 billion, fueled by demand for cloud and IT infrastructure. Hyperscale centers lead, with strong outlook in edge computing and sustainability. Now comes the crucial part: turning this vision into reality.

Article Content
