

Use pigtails to thread the yarn

Overview

To thread: looking at the pigtail so the tail of the pigtail is at the back, place the yarn on the front of the stem of the pigtail, then ease it into the gap between the stem and the tail, and then pull over the tail so the yarn drops back into the bore. Pigtails are simply the small tails of weft thread tucked behind the warp at the start of weaving. They might look insignificant, but they're absolute heroes when it comes to structure, neatness, and overall weaving confidence. In tapestry weaving, the warp threads run vertically on your loom and. This video shows you how to start weaving on a loom already warped (see my separate video on how to warp a Mirrix). No need for threading tools etc.) If you're using the shedding device, that selvedge warp thread will be.
