

What is the waterproof rating of the outdoor server rack

Overview

The IP66 rated design effectively prevents dust and water from entering the cabinet, ensuring that your precious devices remain protected from rain, snow, and other environmental elements. A waterproof server rack is a hardened 19-inch equipment enclosure engineered to protect sensitive electronics from environmental stressors—primarily water ingress, dust, UV degradation, and thermal cycling. Unlike indoor data cabinets, these units carry formal Ingress Protection (IP) ratings. NEMA 12 enclosures are constructed for indoor use and provide a degree of protection to internal equipment against circulating dust, falling dirt, lint, and fibers. These advanced enclosures are specifically engineered to protect sensitive network systems operating in extreme weather and industrial. AZE's 27U weatherproof outdoor enclosure with 1000W air conditioner is designed to house a variety of telecommunication equipment with 19" or 23" rack rails, standard features that include HVAC climate control, they can provide outstanding environment protection from vandalism, dust, rain, snow and. AZE's 19" outdoor server racks and outdoor network cabinets are ideal for protecting sensitive network systems from any damage due to impacts and harsh climatic conditions. These are manufactured from galvanized steel, aluminum or stainless steel material, making them the perfect layer of security. This weatherproof cabinet is designed to provide robust protection with its impressive IP66 rating. It ensures resistance to dust and water, which is a huge deal.
