

Wide-temperature industrial switch models

Overview

Managed, unmanaged and Power-over-Ethernet (PoE) IP20- and IP67-rated Industrial Ethernet Switches are robust and versatile, helping enable industrial automation and monitoring in challenging conditions subject to extreme temperatures, dust and moisture. Extreme Industrial Switches are a family of ruggedized Layer 2 switches designed to operate under harsh environments and extended temperature conditions. They provide continuous uptime, manageability, and operational efficiency. With flexible PoE options of IEEE 802. All products fulfil the highest requirements for reliable and flexible industrial Ethernet communication. Through industrial-grade component selection and efficient heat dissipation design, it ensures 7x24 hours of stable operation under extreme. Increase productivity, boost security, and empower industrial AI with Cisco's wide range of market-leading industrial switches. If a preset temperature is reached, then the temperature switch opens or closes a corresponding switch contact.
